Ascon Landfill Site Emergency Action **INFORMATIONAL OPEN HOUSE**

October 5, 2005
6 p.m. to 9 p.m.

Edison Community Center, 21377 Magnolia Street, Huntington Beach

You are invited to drop in and discuss the progress of the removal action at the Ascon Landfill site, located at the southwest corner of Hamilton Avenue and Magnolia Street in Huntington Beach. The site is a former landfill that accepted oil field waste. Workers are currently removing some of the waste from surface lagoons and strengthening earthen berms that may have been weakened during last year's heavy rainfall. Staff will be on hand to answer questions and address concerns about odor control, safety, air quality monitoring, truck traffic, and other issues. There will be no formal presentations.

Participants will include:

- Staff from our agency, the California Department of Toxic Substances Control (DTSC), which is overseeing the emergency action
- Representatives of the current site owners and the Responsible Parties conducting the cleanup
- Field staff who are performing the work
- Representatives from the South Coast Air Quality Management District

For more information, please contact:

Kim Foreman, DTSC Public Participation Specialist
